Professional Summary

Software Engineer with hands-on experience building web applications and REST APIs using React.js, Node.js, and Express.js. Experienced in developing enterprise web solutions and integrating AI-powered features using LLM APIs and Local AI Models, with a focus on practical, maintainable software development.

Education

FAST National University of Computer and Emerging Sciences
Bachelor of Science in Computer Science

Karachi, Pakistan
2023 – Present

Technical Skills

Languages: JavaScript (ES6+), C++, Python, TypeScript, SQL

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, Axios

Databases: MongoDB, MySQL, Firebase

Mobile: React Native

AI: Gemini API, LLM API Integration, Prompt Engineering

Tools: Git, GitHub, Postman, NPM, Vercel

Experience

Fauji Fertilizer Company (FFC)

Web Development & ERP Intern

Karachi, Pakistan
July 2026 – August 2026

- Developed and maintained web-based modules integrated with the company's ERP system to support internal data access and business workflows.
- Built responsive web interfaces for ERP-linked tools and collaborated with technical and business stakeholders to translate requirements into functional features.
- Debugged and optimized existing ERP-integrated modules, addressing UI and data synchronization issues while documenting module functionality and development processes.

Soft Technologies

Frontend Developer Intern

Karachi, Pakistan
June 2025 – July 2025

- Developed and maintained responsive application features using React.js and Tailwind CSS across different devices and screen sizes.
- Built reusable React components to improve consistency across internal projects and reduce duplicated UI implementation.
- Integrated RESTful APIs using Axios and React Hooks, implementing efficient data flow between frontend applications and backend services.
- Improved frontend performance through lazy loading, code splitting, and efficient state management techniques.

Projects

Smart Hospital System | Node.js, Express.js, MongoDB, React.js, Tailwind CSS

Github Repo

- Developed a full-stack hospital management application with patient registration, appointment scheduling, and electronic health records using the MERN stack.
- Implemented a RESTful API backend with JWT-based role authentication for patients, doctors, and administrators and deployed the application on Vercel.

Ustaad AI | React Native, Expo, Firebase, Gemini API

Github Repo

- Built a cross-platform mobile app for Pakistan's informal economy, enabling natural-language service bookings in English, Urdu, and Roman Urdu through a multi-agent orchestration pipeline.
- Integrated Gemini API for multilingual NLU and engineered a geospatial provider-ranking system using the Haversine formula; developed for the Google Antigravity Hackathon.

AI Resume Builder | React.js, Node.js, Gemini API, REST APIs

Github Repo

- Built a full-stack web application using the Gemini API to generate personalized resume content, with error handling and retry logic.
- Designed a reusable React component structure with custom PDF generation for professional document export.
